IV. *Neighborhood Issues (continued)*

Statements About Proximity of Home:

Home Closer to Work	64
Home Closer to Shopping	65
Home Closer to a Park/Open Space	66
Could Walk to More Places From Home	67
Albuquerque Bus Service Was Closer to Home	68

Distance Traveled From Home to:

Get Groceries	69
Get a Prescription	70
Get Clothing	71
Get Hardware	72
Get Fast Food	73
Get Food at a Sit-Down Restaurant	74
See Movies/Entertainment	75
Get Health Care	76
Get Gasoline	77
Do Banking	78

V. *Evaluation of APD*

Victim of Crime in the Past Year	80
Reported an Incident to APD in the Past Year	81
Evaluation of APD Response to a Report of an Incident	82
Seen Albuquerque Police Officers Perform Various Activities in the Past Year:	
Talking with Residents	83
Engaging in Crime Prevention Activities in Neighborhood	84
Doing Recreation/School Activities with Children	85
Attending to Issues Such As Littering & Graffiti	86
Attending to Issues Such As Vandalism/Abandoned Cars/Other Nuisances	87
Patrolling on Bikes or Foot	88

VI. *Community Involvement*

Types of Community Service Activities Volunteered Time to in the Past Year	90
Number of Times Participated in Volunteer Activities in the Past Year	91
Place of Residence of Elderly Relative	92
Number of Hours Per Week Typically Spend Caring for Elderly Relative	93
Extent to Which Caring for Elderly Relative Affects Personal Lifestyle	94

VII. *Water Conservation*

Consider Household to be Saving Water	96
Types of Encouragement to Participate in City's Water Conservation Program	97
Willing to Conserve More Water or to Support Stronger Community Water Conservation Programs to Protect the Existence of the Rio Grande Silvery Minnow	98

Table of Contents

VIII. Transportation

Work or Go to School Outside the Home.....	100
Distance of One-Way Trip From Home to Work	101
Number of Trips Taken in Typical Week Using Various Transportation Modes to Get to & From Work or School:	
Drive Alone in Car	102
Carpool, Drive or Ride with Someone Else in a Private Automobile	103
Ride the Bus.....	104
Ride a Motorcycle.....	105
Ride a Bicycle.....	106
Walk.....	107
Get There Some Other Way.....	108

Financial Status	110
Length of Residency.....	111
Number of Years Lived in Current Home.....	112
Type of Home.....	113
Anticipated Place of Residency 5 Years From Now.....	114
Rent/Own Home.....	115

X. Internet Usage

Internet Access.....	117
Ease in Finding Needed Information on City's Web Page.....	118
Number of Times Ordered Products/Services Online in the Past Year.....	119
Estimated Amount Spent on Products/Services Ordered Online in the Past Year	120
Estimated Amount Spent on Products/Services Ordered Through Catalogs in the Past Year	121
Estimated Amount Spent at Indian Pueblos/Businesses (Excluding Gambling) in the Past Year	122
Frequency Gambling at New Mexico Casinos	123

XI. Demographics..... 124

XII. Questionnaire..... 126

Methodology

This study was commissioned by the City of Albuquerque. The objective of the study was to assess the attitudes and opinions of Albuquerque residents on numerous issues related to their overall quality of life. In addition to measuring satisfaction with city services, the study measured citizen perceptions regarding a number of issues currently facing the City of Albuquerque.

The Interview

Respondents were interviewed by telephone. Telephone numbers were generated using a random digit dialling method.

Work week telephone calls were made primarily during the evening hours while weekend interviews were conducted during both the day and evening. Interviews were conducted between June 11 and July 28, 2003.

The telephone interviewers are professionals who are brought together for a training session prior to each survey. This ensures their complete understanding of the survey instrument.

Sample

This study included a random cluster sample of 1,356 residents currently living in the City of Albuquerque. For city planning purposes, Albuquerque is divided into ten City Planning Areas (CPA's) (a map is shown on the following page). Research & Polling surveyed approximately 150 households in each planning area. For purposes of this study, the Southwest Mesa and South Valley planning areas were merged because many of the households in these regions are outside the municipal boundaries of the City of Albuquerque. In order to ensure a representative sample, the results were then weighted at the CPA level so that each CPA received its proportional share of interviews based upon 2000 Census population counts.

Sample Bias

In any survey, there are some respondents who will refuse to speak to the professional interviewer. A lower response rate among certain types of individuals can result in a sample wherein certain types of individuals are over-represented or under-represented. The potential for sampling bias increases as the response rate decreases. Research & Polling, Inc. often sets quotas for various segments of the population which are historically undercounted. This has the effect of minimizing but not necessarily eliminating sampling bias.

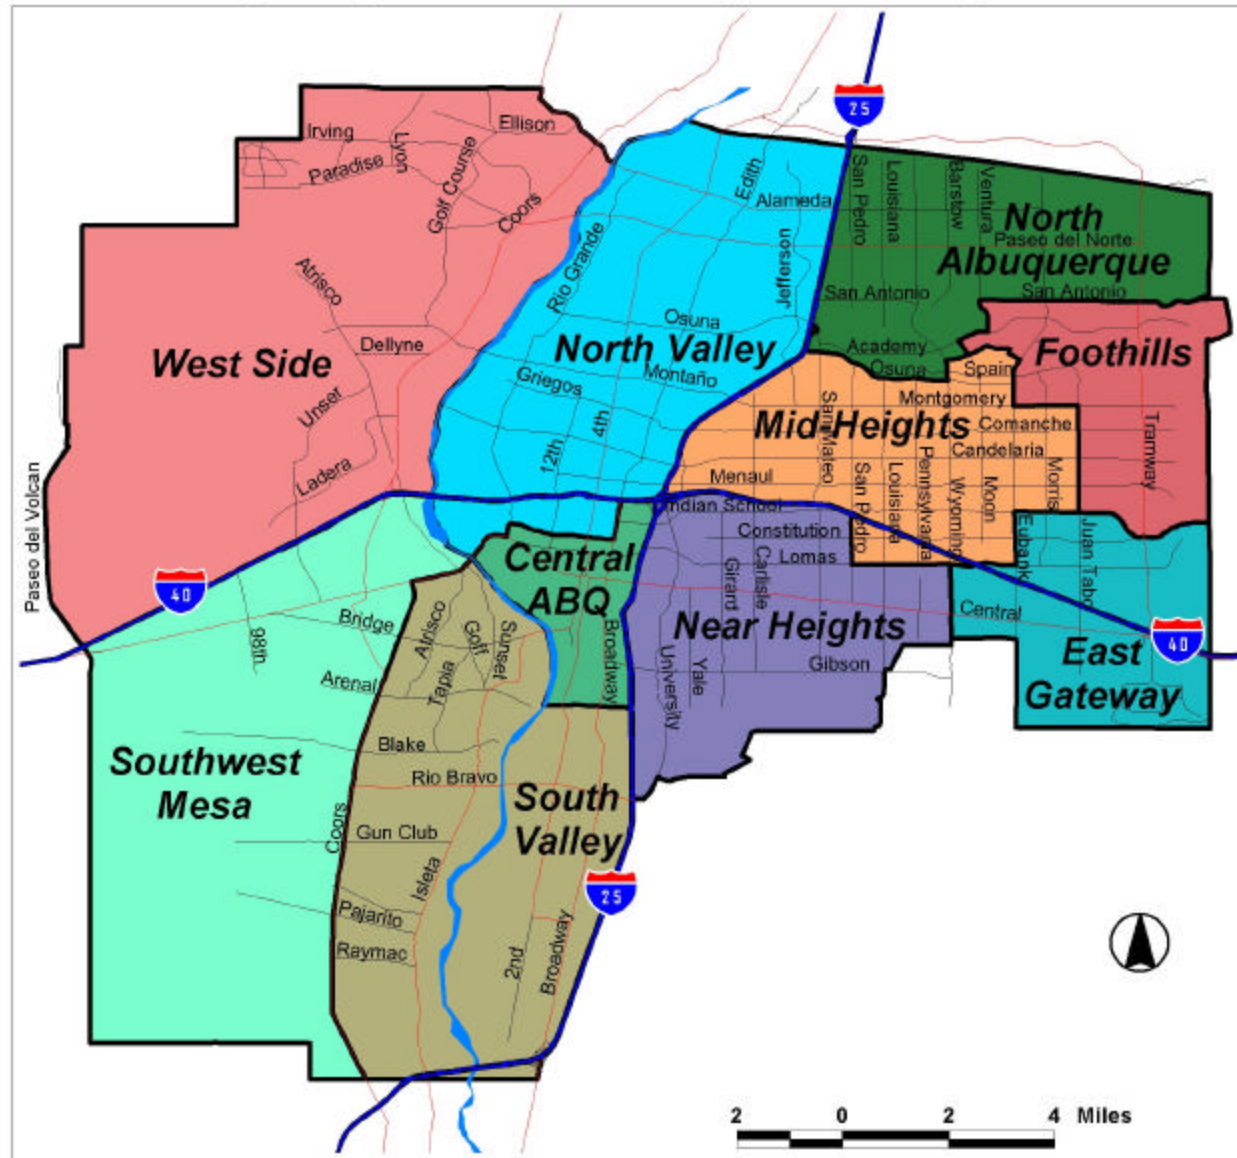

Margin of Error

A sample size of 1,356 at a 95% confidence level provides a maximum margin of error of approximately $\pm 2.7\%$. In theory, in 95 out of 100 cases, the results based on a sample of 1,356 will differ by no more than 2.7 percentage points in either direction from what would have been obtained by interviewing all adult residents living in Albuquerque.

The Report

This report summarizes the results for each question in the survey and reports on any variances in attitude or perception where significant among demographic subgroups. The demographic subgroups highlighted for this study include: gender, ethnicity, age, level of education, household income, length of residency, number of people living in household and home ownership status. The report also tracks certain questions to those asked in previous studies conducted in 1999 and 2001.

Albuquerque Community Planning Areas

Executive Summary

With its wonderful climate, beautiful mountain setting, cultural diversity and friendly inhabitants, the City of Albuquerque offers residents a truly unique quality of life. The significant growth the city has experienced over the past decade is testament to the fact that Albuquerque has much to offer and has become a highly desirable place to live. The growth that has taken place over the past decade has given rise, however, to new and challenging problems that the city must address in order to preserve our quality of life. For instance, the issue of water has become an even bigger concern over the past few years, largely attributable to the fact that the region has entered into a prolonged period of drought, which is not showing any signs of abating.

Many residents are concerned about Albuquerque's growth rate. In fact, nearly half (47%) of city residents believe Albuquerque is currently growing *too fast*, though this is down considerably from 62% observed in 1999. The change in attitudes toward growth can be explained at least in part by a change in demographics. Just 26% of residents who have lived in Albuquerque for five years or less believe the city is growing *too fast* compared to 52% of those who have lived here for more than five years. This is significant given that nearly one-fifth of those surveyed have lived in Albuquerque for five years or less. Although city residents tend to be slightly less concerned about Albuquerque's growth rate than in the past, they are more inclined to want growth to take place *within* the city, rather than on the outer boundaries of the city. Half the residents say they prefer growth to happen through developing vacant areas of land in the built-up parts of the city, which is up from 44% observed in 2001. Furthermore, just 25% would like growth to happen on vacant land on the outer boundaries, which is down from 30% observed just two years ago. These results seem to indicate that residents are increasingly concerned about urban sprawl.

The large majority of residents (65%) express satisfaction with the overall quality of life in Albuquerque and 78% say the quality of life in their own neighborhood is either *good* or *excellent*. Furthermore, the vast majority of residents say they feel either *very* or *somewhat safe* in their neighborhood when they are out alone during the day (97%) or when they are alone at night (78%). Although the vast majority of residents enjoy the quality of life in their neighborhood and generally feel safe when they are alone, they are twice as likely to say crime has increased in their neighborhood as they are to say it has decreased (21% and 9%, respectively). One-fifth of residents also say they or a household member have been a victim of crime in the past

year. The direct experience that some residents have with crime helps to explain why it is mentioned as the biggest problem facing Albuquerque at this time when residents are asked in an unaided, open-ended manner.

Residents' perception of the police department is very important and may play a role in their overall perception of crime and how effectively crime is being fought in the community. To this end, there appears to be some opportunities for the police department to improve its responsiveness and overall presence within the community. For instance, while 54% of residents who have contacted the police department are satisfied with its responsiveness, 28% feel it was *poor* and another 17% give a *fair* rating for police responsiveness. It should be noted, these results are very similar to those observed in 2001. Furthermore, relatively few residents say they have witnessed the police participating in a wide variety of activities or duties that are associated with community policing. While the primary function of the police is to protect the public and respond to criminal activity, it is also important that residents feel the police have a more personal involvement and concern for their communities.

The city has done a very good job of educating residents about water issues and encouraging residents to reduce their use. In fact, 91% of city residents say they consider their household to be saving water. Residents' concern about our future water supplies plays a very large role in encouraging them to reduce their water usage as are the economic benefits of using less water. Although the vast majority of residents believe reducing water use is important, they are less willing to support stronger water conservation measures solely to support the existence of the Silvery Minnow. While 35% of residents say they are willing to conserve more water or support stronger community water conservation programs to protect the Silvery Minnow, 57% are unwilling to do so. Water rights and the Silvery Minnow has been a very contentious topic, with very strong opinions on both sides of the issue. There is little debate, however, that as Albuquerque continues to grow, water will become an even bigger issue, especially given the limited supplies in the area and threat of a continued drought. To ensure the quality of life for future generations, it is essential that growth and planning strategies carefully take into account the limited resources in the area and grow in a way that both ensures economic vitality, while also protecting the unique way of life the city offers.

Favorite Aspects About Albuquerque*(Top 7 Unaided Responses)*

	2003 Sample (N=1356)
Climate/weather is pleasant	58%
Friendly people	16%
Scenic mountain setting	13%
Proximity to mountains/wilderness/rivers/Bosque	11%
Cultural diversity	8%
Easy access to everything	6%
Family is close	6%

*Note: The sum of the percentages exceeds 100% due to multiple responses.***Major Problems Facing Albuquerque Residents***(Top 7 Unaided Responses)*

	2003 Sample (N=1356)
Crime rate is high	36%
Water shortage/water supply	25%
Educational system is poor	10%
Jobs are unavailable/few	9%
Drugs/dealers	9%
Government/political leadership is incompetent	8%
Traffic congestion	8%

Note: The sum of the percentages exceeds 100% due to multiple responses.

Residents were asked in an unaided, open-ended manner what they like most about Albuquerque and conversely, what they feel are the biggest problems facing residents. As shown above, the majority of residents (58%) say their favorite aspect about Albuquerque is the climate/weather, while 16% mention the friendly people, 13% mention the scenic mountain setting and 11% say they most enjoy Albuquerque's proximity to mountains/wilderness/rivers/Bosque.

Overall, crime is perceived as being the biggest issue or problem currently facing Albuquerque as it is mentioned by 36% of residents when asked in an unaided, open-ended manner. The water shortage/water supply is mentioned second most frequently (25%), followed by the educational system is poor (10%), jobs are unavailable (9%) and drugs/dealers (9%).

Quality of Life

As previously mentioned, approximately two-thirds (65%) of residents rate the overall quality of life in Albuquerque as being either *good* (58%) or *excellent* (7%). Less than one-in-ten residents (8%) rate the overall quality of life poorly, though one-in-four residents (26%) believe it is just *fair*.

When asked about changes in the quality of life in Albuquerque over the past year, 25% of residents say the city has become a worse place to live over the past year, though 16% say it has become a better place. The majority of residents (57%) do not feel the quality of life in Albuquerque has changed over the past year. These results exhibit a slight improvement over those observed in previous studies. In 1999, 32% of residents felt the quality of life had declined, while just 12% felt it was improving.

As previously mentioned, 19% of area residents have lived in Albuquerque for five years or less, while 11% have been here between 6 to 9 years and 14% have lived here between 10 to 19 years. The majority of residents (54%) have lived in Albuquerque for 20 years or more. Albuquerque's newer adult residents tend to be younger; in fact, 52% of residents who have moved to Albuquerque in the past five years are between 18 and 35 years old.

The large majority (78%) of residents plan to continue living in Albuquerque five years from now, though 17% plan on living somewhere else and 6% are unsure. Not surprisingly, younger residents are more apt to have plans on moving, given that this group tends to be more mobile. It is also observed, however, that residents who plan on moving tend to be more critical of the overall quality of life in Albuquerque. Just 46% of those who plan on moving believe the quality of life in Albuquerque is either *good* or *excellent*, while 18% rate it poorly. In comparison, 70% of those who plan on staying in Albuquerque rate the quality of life highly, while just 6% are critical.

The majority (54%) of residents feel that relations between people of different cultures and racial backgrounds in Albuquerque are either *good* (45%) or *excellent* (9%). However, one-in-ten (9%) feel that race and cultural relations are *poor*, while one-third (34%) say they are only *fair*.

Quality of Life in Neighborhood

In addition to exploring various issues of quality within Albuquerque as a whole, residents were asked specifically about the quality of life in their neighborhood. As shown above, over three-quarters (78%) of city residents feel the quality of life in their neighborhood is either *good* (49%) or *excellent* (29%). Seventeen percent characterize the quality of life in their neighborhood as being *fair*, while 5% give either *poor* or *very poor* ratings.

The graph above (to the right) shows differences in the Community Planning Areas (CPA's) for residents who feel the quality of life in their neighborhood is either *good* or *excellent*. Residents in the Foothills express the highest level of satisfaction with 98% giving *good* or *excellent* ratings, followed by the Westside (88%), North Albuquerque (85%) and Mid-Heights (85%). Central Albuquerque residents are least apt to feel their quality of life is *good* or *excellent* (53%).

It should be noted that the 78% of residents overall who rate the quality of life in their neighborhood as either *good* or *excellent* is almost identical to the 77% observed in 2001. However, residents in Central Albuquerque are significantly less likely to express satisfaction with the quality of life in their neighborhood than was observed two years ago, dropping from 67% to 53% currently.

Statements About Neighborhood (Summary Table)*Ranked By Highest Percentage 'Strongly Agree'**2003 Total Sample (N=1356)*

	<i>Strongly Agree</i> 5	4	3	2	<i>Strongly Disagree</i> 1	<i>Don't Know/ Won't Say</i>	<i>Mean †</i>
Your neighborhood is clean and well maintained	44%	29%	18%	6%	4%	*	4.0
People in your neighborhood look out for one another's safety	42%	22%	20%	8%	7%	1%	3.9
City residents have a good selection of diverse neighborhoods in which to live	37%	28%	21%	5%	4%	5%	3.9
Traffic speeds in your neighborhood are safe	27%	24%	18%	13%	17%	1%	3.3

* Less than 1% reported.

† The mean score is derived by taking the average score based on the 5-point scale. The strongly agree response is assigned a value of 5; the strongly disagree response is assigned a value of 1, etc. The "don't know/won't say" responses are excluded from the calculation of the mean.

Residents were asked to rate (on a 5-point scale where 5 is *strongly agree* and 1 is *strongly disagree*) how strongly they agree or disagree with various statements pertaining to their neighborhood. As shown above, approximately three-quarters (73%) of area residents agree (a score of 4 or 5) that their neighborhood is clean and well maintained and almost two-thirds (64%) of area residents agree that people in their neighborhood look out for one another's safety. Approximately two-thirds (65%) of area residents also agree that city residents have a good selection of diverse neighborhoods in which to live. Finally, while half (51%) of area residents agree that traffic speeds in their neighborhood are safe, approximately one-in-three residents (30%) disagree.

Public Safety

Crime is clearly perceived as a major issue facing citizens of Albuquerque and as shown above, approximately one-fifth (21%) of residents feel crime in their neighborhood has increased in the past year. Two-thirds of residents believe crime has stayed about the same in their neighborhood, while 9% feel it has decreased in the past year. Overall, these results are similar to those observed in previous studies.

In terms of personal safety, more than three-quarters of area residents say they either feel *somewhat safe* (40%) or *very safe* (38%) about being alone outside in their neighborhood at night. However, one-in-five residents say they feel either *somewhat unsafe* (12%) or *very unsafe* (8%). It should be noted that 36% of residents in the Central Albuquerque CPA and one-third in the Near Heights CPA say they feel unsafe at night.

Residents are more comfortable during the day as three-quarters (74%) say they feel *very safe* being outside in their neighborhood during the day and 23% say they feel *somewhat safe*. Very few residents (4%) do not feel safe when alone outside during the day. These results are consistent with those observed in previous studies.

Overall, one-in-five city residents say they or a household member was a victim of a crime in the past year. Reports of being a crime victim are highest in the Near Heights (30%) and Central Albuquerque (28%). Furthermore, 30% of area residents say they reported an incident to the APD in the past year. Again, residents in the Near Heights (46%) are most apt to have reported an incident, while residents in the Mid-Heights (17%) are least likely to have reported an incident.

As shown above, the majority (54%) of residents who have reported an incident feel that APD was either *excellent* (14%), *very good* (21%) or *good* (19%) in responding. However, 28% feel their response was *poor* and 17% give a *fair* rating. These results are consistent with those observed in the 2001 study, suggesting there has not been a perceived improvement or decline in police responsiveness over the past two years.

When asked if they have seen Albuquerque police officers performing various activities in the past year, 37% say they have seen police officers talking with residents and 36% say they have seen police officers patrolling on bikes or foot. One-third (34%) have seen Albuquerque police officers attending to issues such as vandalism, abandoned cars or other nuisances and 30% have seen officers engaging in crime prevention activities in their neighborhood. Seventeen percent of residents have seen police officers doing recreation or school activities with children and just 13% have seen officers attending to issues such as littering and graffiti.

Growth Related Issues

Perception of Albuquerque's Growth Rate

Total Sample

	1999 Sample (N=1509)	2001 Sample (N=1352)	2003 Sample (N=1356)
Too fast	62%	53%	47%
Just about right	32%	37%	42%
Too slow	3%	6%	7%
Don't know/won't say	3%	4%	4%

Preferred Type of Growth in Albuquerque's Residential Areas

Total Sample

	2001 Sample (N=1352)	2003 Sample (N=1356)
Grow through developing vacant land in built-up parts of the city	44%	50%
Grow on vacant land that is now on the outer boundaries of the city	30%	25%
Both types of growth (<i>volunteered</i>)	10%	10%
Neither (<i>volunteered</i>)	6%	4%
No growth at all (<i>volunteered</i>)	2%	3%
Don't know/won't say (<i>volunteered</i>)	8%	8%

Almost half (47%) of city residents feel Albuquerque is growing *too fast* while 42% feel the rate of growth is *about right* and 7% feel Albuquerque is growing *too slow*. Older residents, those who have lived in the city for longer periods of time and residents in the North Valley and Central Albuquerque are most apt to feel the city is growing too fast. Interestingly, the percentage of residents who feel the city is growing too fast continues to decline, from 62% in 1999 to 53% in 2001 and 47% currently.

When given two options as to the kind of growth they would like to see, half of residents say they would prefer that residential areas in Albuquerque grow through developing vacant land in the built-up parts of the city, which is up from 44% observed in the previous study. One-quarter of area residents believe growth should take place on vacant land that is now on outer boundaries of the city, while 10% would like to see both types of growth.

Residents were read various ways jobs and economic development could be created in Albuquerque and asked to rate how likely it is that they would improve Albuquerque's economy using a 5-point scale where 5 is *very likely* and 1 is *not at all likely*. As shown above, the vast majority (81%) of residents feels it is likely (a score of 4 or 5) that improving public schools would improve Albuquerque's economy and three-quarters (73%) of residents feel that job training for workers would help improve the local economy. Two-thirds of residents feel it is likely that improving public services such as roads, water, and sewer systems (65%) will help improve the economy as would promoting tourism, conventions, and visitation (66%).

Two-in-five residents have contacted the city in the past year to get information or request services. The vast majority (80%) of those who contacted the city did so by telephone. Thirteen percent contacted the city via the Internet, 12% did so in person and 3% contacted the city by mail.

Among those who have contacted the city in person or by phone in the past year, half are satisfied (as indicated by a score of 4 or 5 on the 5-point scale) with the time it took to reach the right person, though more than one-quarter (27%) are dissatisfied (a score of 1 or 2) and one-fifth (21%) gave a neutral opinion (a score of 3). The majority (54%) of residents who have contacted the city in person or by phone are also satisfied with the helpfulness of city employees. However, more than one-quarter (27%) are dissatisfied with their helpfulness and 17% are neutral. That one-in-four residents express dissatisfaction with the time it took to get a hold of the right person and the overall helpfulness of city employees, suggests that improvements need to be made in this area.

Water Conservation

Consider Household To be Saving Water		Types of Encouragement to Participate in City's Water Conservation Program	
		<i>(Top 4 Unaided Responses)</i>	
	2001 Sample (N=1352)	2003 Sample (N=1356)	2003 Sample (N=1356)
Yes – Consider household to be saving water	91%	91%	Already reducing water use 44%
No – Do not consider household to be saving water	8%	8%	Knowing our water is limited 26%
Don't know/won't say	2%	1%	Lower water bill 12%
			Knowing you are preserving resources 11%

The vast majority (91%) of residents say they consider their household to be saving water, which is identical to the results observed two years ago. When asked in an unaided, open-ended manner what would or has encouraged them to participate in the city's water conservation program, 26% mention knowing our water supply is limited, 12% are encouraged by lower water bills and 11% say knowing they are preserving resources. The plurality of residents (44%) say they are already conserving water.

Although the majority of residents apparently believe it is important to conserve water, most are not willing to support more water conservation programs or water reductions to protect the Silvery Minnow. While more than one-third (35%) of residents indicate they are willing to conserve more water or to support stronger community water conservation programs to protect the existence of the Rio Grande Silvery Minnow, nearly three-fifths (57%) say they are not willing to do so. Younger residents, those who have attended graduate school, and those who have lived in Albuquerque for five years or less are more likely to say they would be willing to conserve more water for the Silvery Minnow.

Transportation Issues

Statements About Proximity of Home (Summary Table)
Ranked By Highest Percentage 'Strongly Agree'
 2003 Total Sample (N=1356)

I wish...	Strongly Agree 5	4	3	2	Strongly Disagree 1	Don't Know/ Won't Say	Mean †
I could walk to more places from home	25%	14%	18%	7%	31%	5%	2.9
My home was closer to where I work‡	24%	8%	16%	11%	41%	-	2.6
The Albuquerque bus service was closer to my home	20%	9%	13%	9%	39%	10%	2.6
My home was closer to a park or open space	19%	10%	13%	11%	43%	5%	2.5
My home was closer to shopping	15%	7%	19%	11%	43%	4%	2.4

† The mean score is derived by taking the average score based on the 5-point scale. The strongly agree response is assigned a value of 5; the strongly disagree response is assigned a value of 1, etc. The "don't know/won't say" responses are excluded from the calculation of the mean.

‡ Among those working outside the home.

Residents were asked to rate (on a 5-point scale where 5 is *strongly agree* and 1 is *strongly disagree*) how strongly they agree or disagree with various statements regarding the proximity of their home to specific services or amenities. Approximately two-fifths (39%) of residents indicate they would like to be able to walk to more places from home (as indicated by a score of 4 or 5 on the 5-point scale) and 32% of those who are employed outside the home wish their home was closer to where they work. Twenty-nine percent of residents wish the Albuquerque bus service was closer to their home and another 29% would like to be closer to a park or open space. Less than one-quarter (22%) of residents wish their home was closer to shopping.

Distance Traveled From Home to Various Destinations <i>Among Those Who Participate in the Specific Activity</i> 2003			
	<i>Less Than 1 Mile</i>	<i>1 to 3 Miles</i>	<i>More Than 3 Miles</i>
Get gasoline (N=1320)	60%	33%	7%
Get fast food (N=1272)	56%	37%	7%
Get groceries (N=1344)	46%	42%	12%
Get a prescription (N=1292)	46%	40%	14%
Do banking (N=1318)	40%	42%	18%
Get food at a sit-down restaurant (N=1334)	36%	42%	21%
Get hardware (N=1297)	19%	42%	38%
Get clothing (N=1330)	15%	37%	49%
Get health care (N=1333)	13%	32%	55%
See movies/entertainment (N=1248)	12%	34%	53%

The table above shows how far residents have to drive from their home to various destinations. For instance, the majority of residents travel less than one mile to get gasoline (60%) or fast food (56%), while nearly half travel less than a mile to get groceries (46%) or a prescription (46%). In comparison, the majority of residents travel more than three miles to get health care (55%) or to see a movie/go out for entertainment (53%), while 49% travel more than three miles to shop for clothing.

Half of Albuquerque residents currently work outside the home, while 9% both work and go to school outside the home and 4% attend school outside the home. The majority (55%) of residents who work outside the home travel less than five miles (one-way), with 28% saying their home is two miles or less from their workplace. In comparison, less than one-in-five commuters say they travel seven miles or more to work. The median distance traveled to work is five miles.

Utilization of Various Types of Transportation in a Typical Week <i>Among Those Who Either Work, Go to School or Do Both Outside of the Home</i>		
	2001 Responses (N=874)	2003 Responses (N=851)
Drive alone in your car	88%	90%
Carpool, drive or ride with someone else in a private automobile	14%	12%
Ride a bicycle	6%	8%
Walk	7%	6%
Ride the bus	4%	3%
Ride a motorcycle	2%	2%
Get there some other way	1%	2%

Approximately two-thirds of city residents either work outside the home (50%), go to school (4%) or both (9%). Residents who work and/or go to school outside the home were asked if they use various modes of transportation when commuting in a typical week. As shown above, the vast majority (90%) makes at least one trip by driving in their car alone, while 12% carpool at least once a week. Eight percent of commuters make at least one trip to work and/or school by riding a bicycle, 6% walk and 3% take a bus. Overall, these results are very similar to those observed two years ago.

Internet Access & Usage

As shown above, two-thirds (68%) of residents have access to the Internet. Sixty-two percent of the residents have access at home, 28% access the Internet at work, 3% go to the library and 3% access the Internet from other places. Anglo residents, those with higher levels of income and education and those under the age of 50 are most apt to have Internet access. Interestingly, the percentage of residents who say they have Internet access at home has increased from 50% in 2001 to 62% currently.

One-quarter (24%) of residents who have Internet access say they have accessed the city's web page and found it easy to find the information they needed. The large majority (63%) have not accessed the city's website. Overall, residents are slightly more apt to have accessed the city website than was observed two years ago (37% and 32%, respectively).

**Estimated Amount Spent on
Products/Services Ordered Online in the Past Year**

	<i>Total Sample</i>	
	<i>2001 Sample (N=1352)</i>	<i>2003 Sample (N=1356)</i>
\$100 or less	6%	6%
\$101 to \$250	6%	7%
\$251 to \$500	6%	9%
\$501 to \$1,500	2%	7%
\$1,501 or more	9%	7%
Have not ordered anything	24%	25%
Don't know/won't say	5%	7%
Do not have Internet access	43%	32%

More than four-in-ten (42%) Albuquerque residents say they have ordered products or services over the Internet in the past year. Nearly one-quarter (24%) have made six or more orders in the past year, while 18% have done so five times or less. In total, 7% of city residents spent more than \$1,500 over the past year on goods and services purchased over the Internet, while 16% spent between \$251 and \$1,500 and 13% spent \$250 or less.

Spending Patterns

Estimated Amount Spent on Products/Services Ordered Through Catalogs in the Past Year		Estimated Amount Spent at Indian Pueblos/Businesses (Excluding Gambling) in the Past Year	
	2003 Sample (N=1356)		2003 Sample (N=1356)
\$100 or less	6%	\$30 or less	6%
\$101 to \$150	8%	\$31 to \$99	7%
\$151 to \$200	7%	\$100 to \$199	7%
\$201 to \$450	4%	\$200 to \$499	6%
\$451 or more	11%	\$500 or more	5%
Didn't order from catalog companies	60%	Did not buy anything at an Indian pueblo/business	67%
Don't know/won't say	4%	Don't know/won't say	2%

Thirty-six percent of residents have ordered products or services through catalogs in the past year. In total, 11% spent more than \$450 while 11% spent between \$151 and \$450. Fourteen percent spent \$150 or less in the past year on catalog purchases.

It is also observed that 31% of city residents report having spent money (excluding gambling) at an Indian pueblo or pueblo-owned business in the past year (11% spent \$200 or more).

Twenty-nine percent of residents say they gamble at casinos in New Mexico at least once a year. Eight percent gamble either monthly (6%) or weekly (2%), while 5% gamble every three months and 16% gamble once or twice a year.

Change in Albuquerque's Quality of Life

Question 1: Overall, in the past year, would you say that the City of Albuquerque has become a better place to live, is about the same, or has become worse?

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income										
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

* Less than 1% reported.

City residents are more likely to feel Albuquerque has become a worse place to live over the past year (25%) than they are to feel it has become a better place (16%). The majority of residents (57%) feel the quality of life in Albuquerque is about the same as it was last year.

Residents who are more apt to feel Albuquerque has become a worse place to live over the past year include:

- women (29%) as compared to men (20%);
- those age 35 and over as compared to younger residents (28% and 14%, respectively);
- those with some college education or less (28%) compared to those with a 4 year college degree or higher (18%); and
- those who have lived in Albuquerque 10 years or more (30%) as compared to newer residents (14%).

Overall Quality of Life in Albuquerque

Question 2: How would you rate the overall quality of life in Albuquerque? Would you say it is excellent, good, fair, poor, or very poor?

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income				
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

† The mean score is derived by taking the average score based on the 5-point scale. The very likely response is assigned a value of 5; the not at all likely response is assigned a value of 1, etc. The "don't know/won't say" responses are excluded from the calculation of the mean.

Two-thirds of residents feel it is likely (a score of 4 or 5 on a 5-point scale) that promoting tourism, conventions and visitation will improve the local economy. Just 12% percent do not feel it is likely to improve Albuquerque's economy (a score of 1 or 2) and 21% have a neutral opinion (a score of 3).

Likelihood of Improving Albuquerque's Economy: Develop a Vital Downtown

Question 6: I will read you a list of ways jobs and economic development could be created in Albuquerque. For each, please rate how likely you believe it is to improve Albuquerque's economy. Rate each anywhere between 1 and 5, where 5 means it is very likely to improve Albuquerque's economy, and 1 means it is not at all likely to improve Albuquerque's economy. **Develop a vital downtown**

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income

Just under half (47%) of area residents feel Albuquerque is growing too fast, while 42% feel the rate of growth is about right and just 7% feel the city is growing too slowly. Residents who are more apt to feel Albuquerque is growing too fast include:

- residents 35 years of age and over (53%) as compared to younger residents (30%);
- residents of the North Valley (65%) and Central Albuquerque (60%); and
- those who have lived in Albuquerque 20 years or more (55%) as compared to those living here for 5 years or less (26%).

Preferred Type of Growth in Albuquerque's Residential Areas

Question 66: In your opinion, should Albuquerque residential areas grow through developing vacant land in the built-up parts of the city or grow on vacant land that is now on the outer boundaries of the city?

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income				
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

When given the option, half of residents say they would prefer that residential areas in Albuquerque grow through developing vacant land in the built-up parts of the city. One-quarter disagree, believing growth should take place on vacant land that is now on the outer city boundaries, while 10% would like to see both types of growth.

Age: Residents under the age of 65 are more likely than seniors to prefer the city grow through developing vacant land in built-up parts of the city (53% and 41%, respectively). It should be noted, however, that 15% of seniors want neither type of growth or no growth at all.

Ethnicity: Anglo residents are more likely than Hispanics to prefer the city grow through developing vacant land in built-up parts of the city rather than on land on the outer boundaries (57% and 41%, respectively). Hispanics are almost twice as likely as Anglos to prefer growth to happen on vacant land on the outer boundary of the city (35% and 19%, respectively).

Education: As level of education increases, so too does the likelihood of preferring the city grow through developing vacant land in built-up parts of the city.

Community Planning Area: The plurality of residents in the Southwest Mesa/South Valley (43%) say they would prefer growth on vacant land that is now on the outer boundary of the city.

Contacted the City to Get Information/Services in the Past Year

Question 75: Over the past year, have you contacted the City to get information or services?

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income				
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

Over the past year, two-fifths of residents indicate they have contacted the city to get information or services.

Those more likely to have contacted the city to get information or services include:

- residents between 18 and 64 years of age (42%) compared to those 65 years of age and over (29%);
- Anglos (47%) as compared to Hispanics (31%);
- those with a household income higher than \$20,000 annually (44%) compared to those who earn \$20,000 or less annually (27%); and
- those who have at least some college education or higher (47%) compared to those who have a high school education or less (28%).

Most Recent Form of Contact

Among Those Who Have Contacted the City for Information or Services Over the Past Year

Question 76: Thinking of your most recent contact, did you contact the City in person, by telephone, by mail or by Internet?

	Total Responses (N=539)	Gender		Age				Ethnicity		Annual Household Income				
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

* Less than 1% reported.

Almost four-fifths (78%) of city residents feel the quality of life in their neighborhood is either *good* (49%) or *excellent* (29%). Seventeen percent characterize the quality of life in their neighborhood as being *fair* while 5% give either *poor* or *very poor* ratings. Residents more likely to rate the quality of life in their neighborhood as *excellent* include:

- those 65 years of age and over (41%);
- Anglos (33%) as compared to Hispanics (23%);
- those with a household income of \$75,000 or more annually (50%); and
- those who live in the Foothills (51%), North Albuquerque (42%) and the Westside (40%) compared to those who live in Central Albuquerque (11%), the Southwest Mesa/South Valley (15%), the Near Heights (18%) and the North Valley (22%).

Noticed Neighborhood Owner-Occupied Homes Turning Into Rentals

Question 16: In your neighborhood, have you noticed in the last year that owner-occupied homes are turning into rentals?

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income				
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

One-third of city residents have noticed that owner-occupied homes in their neighborhood have turned into rentals in the past year. Residents who are more apt to say they have noticed that owner-occupied homes are turning into rentals include:

- Hispanics (41%) as compared to Anglos (28%);
- those earning less than \$75,000 (34%) as compared to those with higher incomes (22%); and
- residents of the Southwest Mesa/South Valley (43%) and the Near Heights (41%).

Crime in Neighborhood in the Past Year

Question 17: In the past year, do you think crime in your neighborhood has increased, decreased or stayed the same?

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income				
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

Approximately one-fifth (21%) of residents feel crime in their neighborhood has increased in the past year while 9% believe it has decreased and two-thirds (67%) believe crime has stayed about the same. Those who are more likely to feel crime in their neighborhood has increased include:

- women (25%) as compared to men (17%);
- those earning \$20,000 or less annually (34%); and
- residents of the Near Heights (31%) and the Southwest Mesa/South Valley (28%).

It is interesting to note that one-fifth (19%) of residents living in the Central Albuquerque CPA feel crime has decreased, as do 16% of residents living in the North Valley CPA.

Personal Safety Being Out in Neighborhood at Night

Question 18: In your neighborhood, how do you feel about being outside at night by yourself? Do you feel very safe, somewhat safe, somewhat unsafe, or very unsafe?

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income				
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

* Less than 1% reported.

Almost four-fifths (78%) of area residents say they either feel *somewhat safe* (40%) or *very safe* (38%) about being alone outside in their neighborhood at night. However, one-in-five residents say they feel either *somewhat unsafe* (12%) or *very unsafe* (8%).

Residents who are more apt to say they feel *somewhat* or *very unsafe* include:

- women (26%) as compared to men (14%);
- residents who earn \$20,000 or less annually (31%); and
- residents of the Central Albuquerque CPA (36%) and Near Heights (33%).

Personal Safety Being Out in Neighborhood During the Day

Question 19: In your neighborhood, how do you feel about being outside during the day by yourself? Do you feel very safe, somewhat safe, somewhat unsafe, or very unsafe?

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income				
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

* Less than 1% reported.

† The mean score is derived by taking the average score based on the 5-point scale. The strongly agree response is assigned a value of 5; the strongly disagree response is assigned a value of 1, etc. The "don't know/won't say" responses are excluded from the calculation of the mean.

Almost two-thirds (64%) of area residents agree that people in their neighborhood look out for one another's safety, while 15% disagree (a score of 1 or 2) and one-fifth have a neutral opinion.

Residents who are more apt to *strongly agree* that people in their neighborhood look out for one another's safety include:

- women (47%) as compared to men (37%);
- residents 65 years of age and over (49%) compared to younger residents (40%);
- Hispanics (51%) compared to Anglos (37%);
- those with a high school education or less (53%) compared to those with higher levels of education (35%); and
- residents of the Southwest Mesa/South Valley (54%), the Westside (51%) and the North Valley (51%).

Statements About Neighborhood: Clean & Well Maintained

Question 21: Please rate the following statements anywhere between 5 and 1, where 5 means you strongly agree, and 1 means you strongly disagree. **Your neighborhood is clean and well maintained**

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income

* Less than 1% reported.

† The mean score is derived by taking the average score based on the 5-point scale. The strongly agree response is assigned a value of 5; the strongly disagree response is assigned a value of 1, etc. The "don't know/won't say" responses are excluded from the calculation of the mean.

Approximately three-quarters (73%) of area residents agree (a score of 4 or 5 on a 5-point scale) that their neighborhood is clean and well maintained, while one-in-ten disagree (a score of 1 or 2) and one-fifth (18%) have neutral or mixed feelings (a score of 3).

Residents who are more apt to *strongly agree* that their neighborhood is clean and well maintained include:

- women (48%) as compared to men (39%);
- residents 65 years of age and over (54%) compared to younger residents (41%);
- those with a household income of \$75,000 or more annually (58%) compared to residents with lower annual household incomes (41%); and
- residents of the Foothills (62%), Westside (55%) and North Albuquerque (55%). Approximately one-third (34%) of residents living in Central Albuquerque disagree.

Statements About Neighborhood: Traffic Speeds are Safe

Question 22: Please rate the following statements anywhere between 5 and 1, where 5 means you strongly agree, and 1 means you strongly disagree. **Traffic speeds in your neighborhood are safe**

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income				
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

† The mean score is derived by taking the average score based on the 5-point scale. The strongly agree response is assigned a value of 5; the strongly disagree response is assigned a value of 1, etc. The "don't know/won't say" responses are excluded from the calculation of the mean.

Twenty-two percent of residents indicate they would like for their home to be closer to shopping.

Those more likely to *strongly agree* include:

- women (19%) as compared to men (11%);
- Hispanics (20%) as compared to Anglos (10%);
- residents with a household income of \$20,000 or less annually (24%);
- those with some high school or less education (26%); and
- residents living in Central Albuquerque (31%) and the Near Heights (27%).

Statements About Proximity of Home: Home Closer to a Park/Open Space

Question 26: Now I will read you various statements. Please rate each one anywhere between 5 and 1, where 5 means you strongly agree and 1 means you strongly disagree. I wish: **My home was closer to a park or open space**

The vast majority (91%) of residents say they consider their household to be saving water.

Types of Encouragement to Participate in City's Water Conservation Program

(Unaided Responses)

Question 54: What would encourage (has encouraged) you to participate in the City's water conservation programs?

	<i>Total Sample (N=1356)</i>		<i>Total Sample (N=1356)</i>
Already reducing water use	44%	Making it convenient/removing barriers	*
Knowing our water is limited	26%	Having time off work to participate in program	*
Lower water bill	12%	Schools/school child encouraged it	*
Knowing you are preserving resources	11%	Letter from mayor	*
Financial incentives	6%	Drought	*
Knowing/doing socially conscious deed	6%	Info on recycling gray water	*
Information on how to reduce water use	5%	I rent so do not pay for water	*
Mix landscaping with xeriscaping & non-xeriscaping	4%	Area meetings	*
Know more about xeriscaping/plants/installment/benefits of	3%	Seeing video tapes about this program	*
Higher water bill/surcharge	3%	Knowing the program is enforced	*
Seeing the city set example/see too much waste by city	2%	Water police patrolling	*
Remembering to practice/reminders to practice it	1%	Cut down golf course watering	*
Know more about low flow toilets/satisfaction with them	1%	Stronger government	*
Media impact	1%	Mayor's leadership for conservation	-
Being able to control behavior of other household members	1%	Industry needs to reduce their usage first	-
Home evaluation and toilet installment at same time	1%	Nothing	5%
Do not have landscaping at property	1%	Don't know/won't say	4%
Do not make property decisions	*		
Knowing the facts about water situation/aquifer	*		
More time to do it/having help doing it	*		

* Less than 1% reported.

When asked in an unaided, open-ended manner what would or has encouraged them to participate in the city's water conservation programs, 26% mention knowing our water is limited, 12% are encouraged by lower water bills and 11% know they are preserving resources. The plurality of residents (44%) say they are already reducing their water usage.

Willing to Conserve More Water or to Support Stronger Community Water Conservation Programs to Protect the Existence of the Rio Grande Silvery Minnow

Question 55: Are you willing, or not, to conserve more water or to support stronger community water conservation programs to protect the existence of the Rio Grande silvery minnow, an endangered species?

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income				
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

More than one-third (35%) of residents indicate they are willing to conserve more water or to support stronger community water conservation programs to protect the existence of the Rio Grande Silvery Minnow. However, the majority of residents (57%) are not willing to conserve more water in order to protect the Silvery Minnow.

Those more likely to say they would be willing to conserve more water for the Silvery Minnow include:

- residents between 18 and 34 years of age (50%);
- those who have attended graduate school (44%);
- residents living in the Near Heights (50%) CPA; and
- those who have lived in Albuquerque for 5 years or less (48%).

Work or Go to School Outside the Home

Question 56: Do you either work, or go to school outside of the home?

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income				
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

The majority (54%) of respondents say they have been a resident of Albuquerque for 20 years or more while 14% have been a resident between 10 and 19 years, 11% have been a resident between 6 and 9 years and 11% have been a resident between 2 and 5 years. Eight percent of those surveyed have been a resident for less than two years.

Residents who are more likely to have lived in Albuquerque for five years or less include:

- residents between 18 and 34 years of age (40%);
- Anglos (24%) compared to Hispanics (10%); and
- residents living in the Near Heights (28%) and Foothills (29%) CPA's.

Number of Years Lived in Current Home

Question 68: For how many years have you lived in your current home?

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income

* Less than 1% reported.

Seventy-three percent of residents are homeowners. Residents who are more apt to own their home include:

- those age 35 and over (79%) compared to younger residents (58%);
- those with a household income of \$50,000 or more (93%);
- those who have lived in Albuquerque 20 years or more (83%); and
- residents of North Albuquerque (83%), Southwest Mesa/South Valley (82%), Westside (82%), East Gateway (80%), and North Valley (79%) compared to those in the Near Heights (47%).

Internet Access

Question 79: Do you access the Internet? Do you access it from home, work, the library, or elsewhere?

	Total Sample (N=1356)	Gender		Age				Ethnicity		Annual Household Income				
		Male	Female	18 to 34 Years	35 to 49 Years	50 to 64 Years	65 Years And Over	Hispanic	Anglo	\$20,000 Or Less	\$20,001 To \$35,000	\$35,001 To \$50,000	\$50,001 To \$75,000	More Than \$75,000

* Less than 1% reported.

Note: The sum of the percentages exceeds 100% due to multiple responses.

More than two-thirds (68%) of residents say they have access to the Internet. Three-fifths (62%) of these residents have access at home, 28% access the Internet at work, 3% go to the library and 3% access the Internet from other places.

Residents who are more apt to have Internet access include:

- Anglos (76%) as compared to Hispanics (55%);
- those whose household income exceeds \$35,000 (84%) compared to those earning \$35,000 or less (47%);
- residents under the age of 50 (79%); and
- those who have some college education or higher (81%).

It should be noted that 56% of residents living in the Southwest Mesa/South Valley and 42% of those living in Central Albuquerque say they do not have access to the Internet.

Ease in Finding Needed Information on City's Web Page

Among Those Who Have Internet Access

Question 80: Have you accessed the City's web page on the Internet? Please rate how easy it was to find the information you needed in the City's website anywhere between 5 and 1, where 5 means very easy and 1 means very difficult.

	Total Responses (N=911)	Gender		Age				Ethnicity		Annual Household Income

**City of Albuquerque
2003 Citizens' Perceptions of Community Conditions
June 2003
FINAL**

(N = 1350, 150 per 9 CPAs (Southwest Mesa & South Valley combined), RDD)

Hello. My name is (YOUR NAME). I'm calling on behalf of the City of Albuquerque. My company, Research & Polling, is doing the annual study for the City about citizens' attitudes and opinions. We are not selling anything. Your household was selected at random, and all of your answers are confidential. May I please speak to someone who is at least 18? (REPEAT INTRODUCTION WITH 18+ RESPONDENT, IF PERSON ANSWERING PHONE IS UNDER 18)

A. Do you reside within Albuquerque city limits?

1. Yes
2. No (*THANK & TERMINATE*)
3. Don't know/won't say (*THANK & TERMINATE*)

1. Overall, in the past year, would you say that the City of Albuquerque has become a better place to live, is about the same, or has become worse?

1. Better place
2. About the same
3. Worse place
4. Don't know/won't say (*DO NOT READ*)

2. How would you rate the overall quality of life in Albuquerque? Would you say it is excellent, good, fair, poor, or very poor?

5. Excellent
4. Good
3. Fair
2. Poor
1. Very poor
6. Don't know/won't say (*DO NOT READ*)

3. What do you like most about Albuquerque? (PROBE) What else? (DO NOT READ CATEGORIES. UP TO 3 RESPONSES)

001. Air quality/atmosphere	016. Everything	031. Open spaces of land
002. Access to sports/skiing	017. Family is close	032. Peaceful/isolated
003. Arts/cultural events	018. Far away from big cities	033. Proximity to mountains/wilderness/rivers, etc
004. Baseball stadium	019. Food/restaurants	034. Presence of SNL/Kirtland AFB
005. Born here/familiarity	020. Friendly people	035. Roads/streets/highways are in good condition
006. Clean town/area	021. Good general programs/facilities	036. Scenic mountain setting
007. Climate/weather is pleasant	022. Jobs are available	037. Small town atmosphere
008. Cost of housing is low/reasonable	023. Government/political leadership is competent	038. Taxes are reasonable
009. Cost of living is low/reasonable	024. Growth rate is just right	039. Traffic is light/low traffic congestion
010. Crime rate is low	025. Higher education available	040. Variety of entertainment
011. Cultural diversity	026. Hospitals/health care are good	041. Wages are good
012. Easy access to everything	027. Labor force/skilled labor available	499. Nothing
013. Economic development	028. Lack of gang/youth problems/graffiti	500. Don't know/won't say
014. Educational system/schools are good	029. Laid back atmosphere	
015. Environmentally clean	030. Nice neighborhoods	

Other (SPECIFY) _____

4. What are the biggest problems facing residents of Albuquerque today? (DO NOT READ CATEGORIES. TAKE UP TO 3 RESPONSES)

001. Air pollution	017. Government/political leadership is incompetent	033. Silvery minnow
002. Bridges over the Rio Grande – too few	018. Graffiti	034. Street repairs are constant/orange barrels
003. Climate/weather is unpleasant	019. Growing too big/too fast	035. Taxes are high/unreasonable
004. Cost of living is high/unreasonable	020. Homelessness is high	036. Tourism is ruining the area
005. Crime rate is high	021. Housing/cost is high/unreasonable	037. Traffic congestion
006. Cultural diversity/lack of	022. Jobs are unavailable/few	038. Transit (city)/lack of
007. Cultural events – too few	023. Labor force/skilled labor unavailable	039. Utilities too high
008. Domestic/family violence	024. Landscaping/vegetation/lack of	040. Vandalism
009. Drought	025. Land development out of control	041. Wages low
010. Drugs/dealers	026. Military presence	042. Water pollution
011. DWI rate is high	027. Noise	043. Water shortage/water supply
012. Educational system is poor	028. Nuclear waste transport/WIPP	044. Youth activities/lack of
013. Economic development/lack of	029. Parking is inadequate	499. Nothing/no drawbacks
014. Family problems	030. People are not friendly	500. Don't know/won't say
015. Fires	031. Recreation facilities/parks/lack of	
016. Gangs	032. Roads/streets/highways are in poor condition	

Other (SPECIFY) _____

I will read you a list of ways jobs and economic development could be created in Albuquerque. For each, please rate how likely you believe it is to improve Albuquerque's economy. Rate each anywhere between 1 and 5, where 5 means it is very likely to improve Albuquerque's economy, and 1 means it is not at all likely to improve Albuquerque's economy. The first is: *(READ RANDOMIZE)*

		<u>Very Likely</u>							<u>Not At All Likely</u>	<u>Don't Know/ Won't Say</u>
5.	Promote tourism, conventions, and visitation	5	4	3	2	1	6
